

Sergey Hayriyan

Software Engineer | Java, Kotlin, Mobile & Game Systems

Yerevan, Armenia | sergdevone@gmail.com | 095 250870 | slateblua.github.io | linkedin.com/in/sergey-h-github.com/slateblua

Summary

Software Engineer with 2 years of production experience building and maintaining large-scale mobile game systems used by 50M+ players. Strong in Java, Kotlin, object-oriented design, REST/HTTP integrations, asynchronous programming, profiling, SDK integrations, analytics instrumentation, and production debugging. Experienced in shipping gameplay, progression, monetization, and stability improvements in live mobile environments.

Experience

Software Engineer, Rockbite Games – Yerevan, Armenia May 2024 – Mar 2026

Worked on Idle Outpost, a live mobile game with 50M+ downloads, contributing to gameplay systems, platform integrations, analytics, performance, and production stability.

- Built and maintained Java/Kotlin game systems for progression, gameplay logic, UI flows, live-ops content, and data-driven feature configuration.
- Implemented REST/HTTP communication layers with structured request/response handling, validation, and error-safe integration with backend-driven product flows.
- Integrated and maintained mobile SDKs for ads, authentication, analytics, and attribution, including AppsFlyer event instrumentation for product and live-ops analysis.
- Profiled runtime performance and reduced memory usage by about **20%**, improving stability on constrained Android and iOS devices.
- Debugged production issues reported by players, QA, and analytics signals; reproduced edge cases and shipped fixes for live mobile releases.
- Supported beta releases and CI/CD workflows, helping shorten feedback loops between engineering, QA, product, and analytics teams.

Education

American University of Armenia, BS in Computer Science – Yerevan, Armenia May 2027

- Relevant coursework: Data Structures, Algorithms, Object-Oriented Programming, Software Engineering, Database Systems, Mobile Application Development, Game Development, Statistics, Probability.
- Philosophy minor with strong writing-intensive coursework, supporting clear technical communication and analytical reasoning.

Skills

Languages: Java, Kotlin, SQL, C#, Lua

Mobile & Game Engineering: Android, iOS, LibGDX, Unity, gameplay systems, progression systems, UI systems, SDK integrations

Backend & APIs: REST, HTTP, Spring, Ktor, structured data validation, backend-driven configuration

Production Engineering: Profiling, memory optimization, analytics instrumentation, CI/CD, GitHub Actions, Gradle, Git, Linux

Languages

Russian (C2), Armenian (C2), English (C2), German (A2)
